Consigli e Training

Desktop

Desktop

La versione desktop rende la sincronizzazione di app e dispositivi semplice e veloce.

Una piccola rivoluzione che permette ad Unsteady di raggiungere tutte le postazioni di lavoro dei suoi utenti.

Rilevazione automatica app

La fase di settaggio non è impegnativa per l'utente grazie al rilevamento automatico delle app installate.

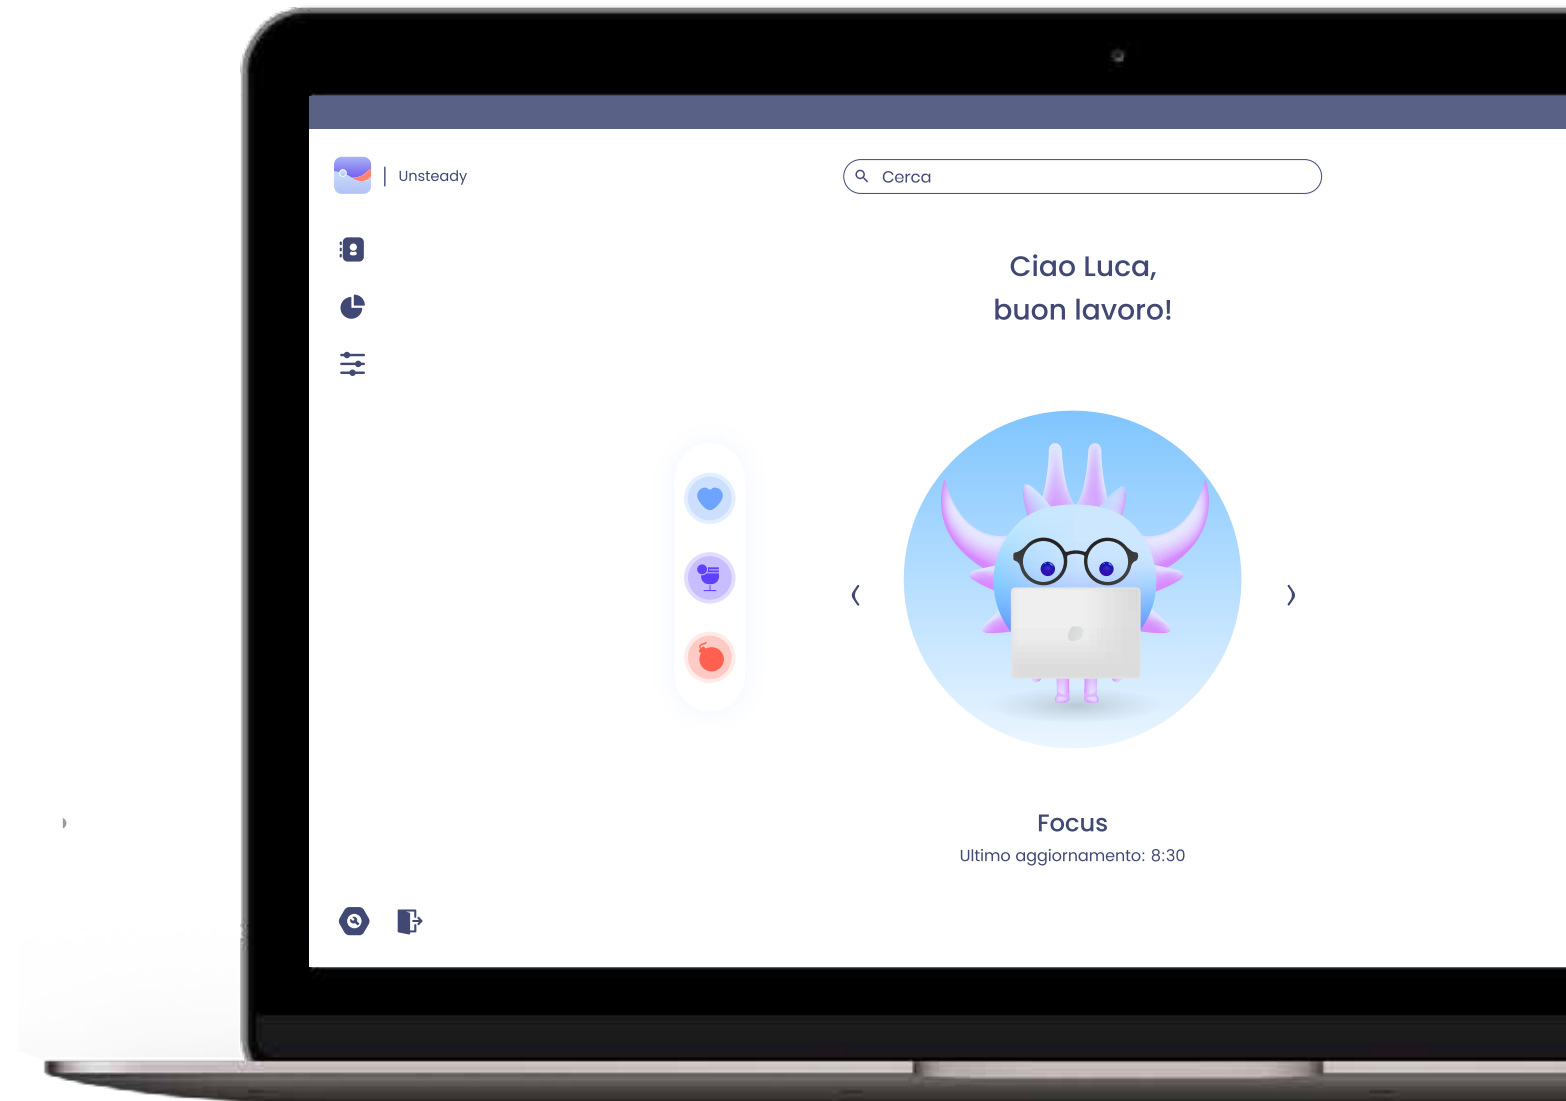

Sincronizzazione dei contatti

Importare e sincronizzare le preferenze dei contatti è rapido e sicuro.

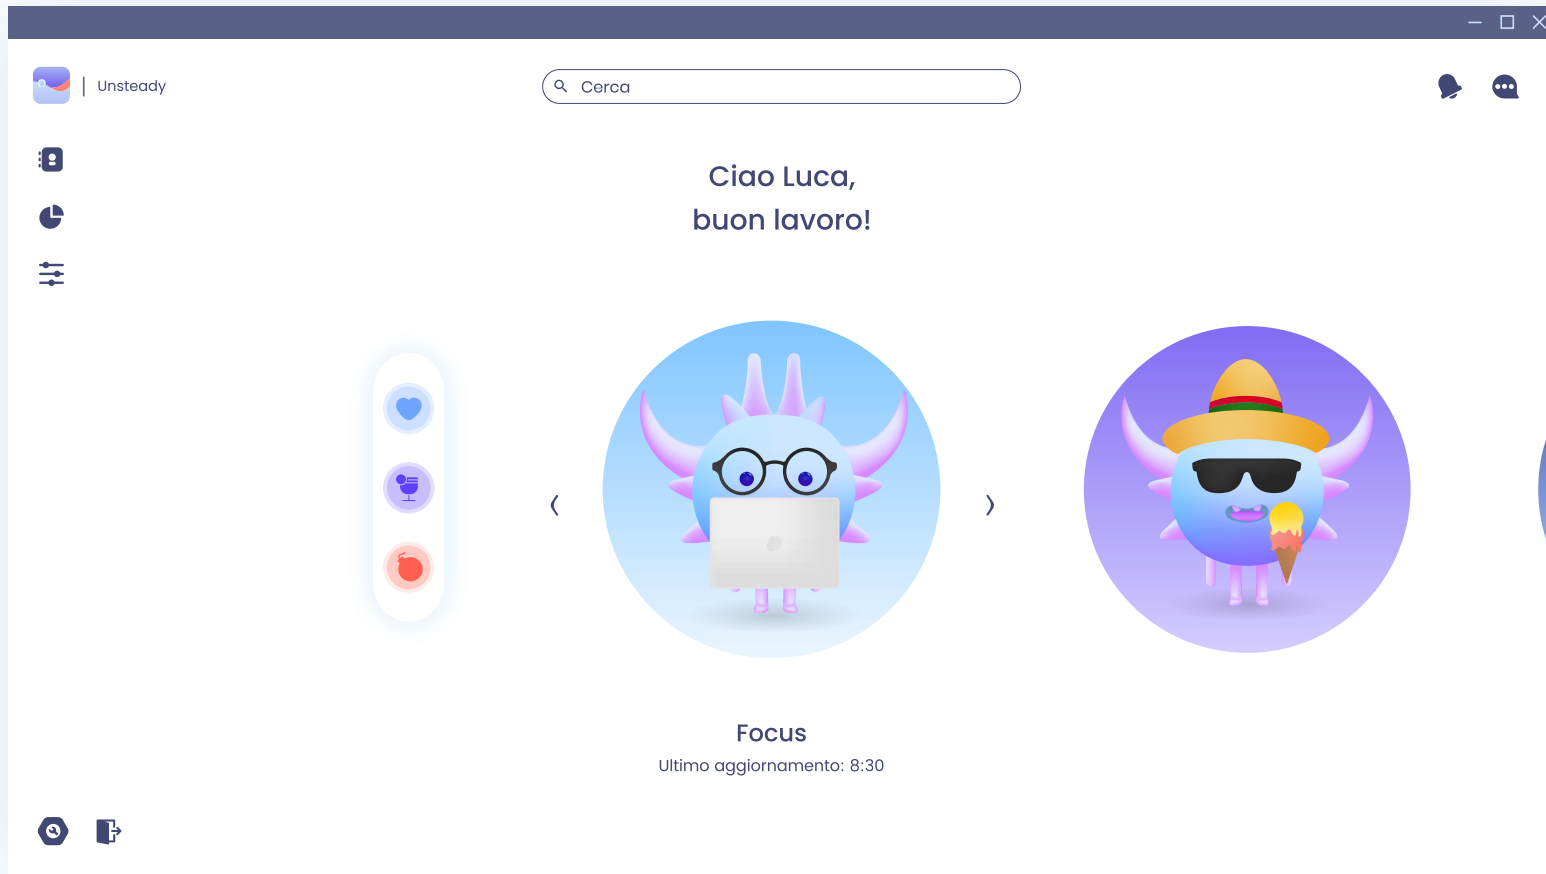

Visualizzazione notifiche

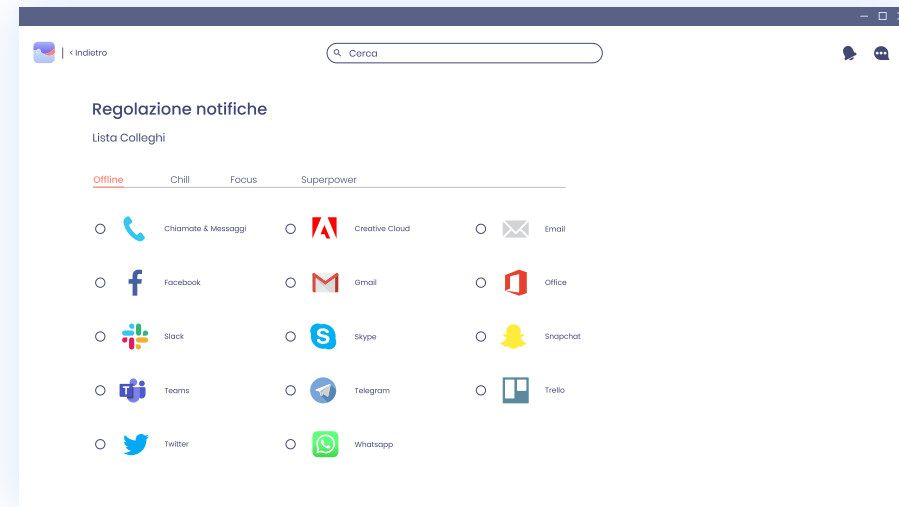

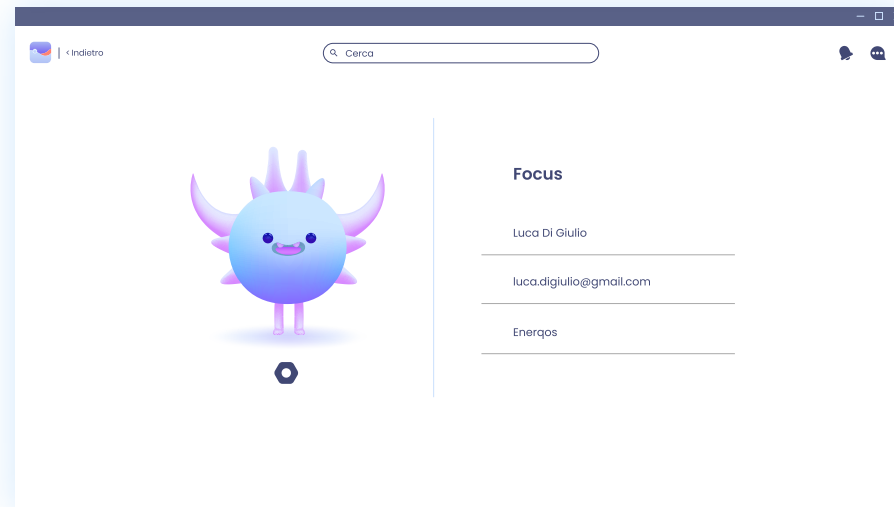

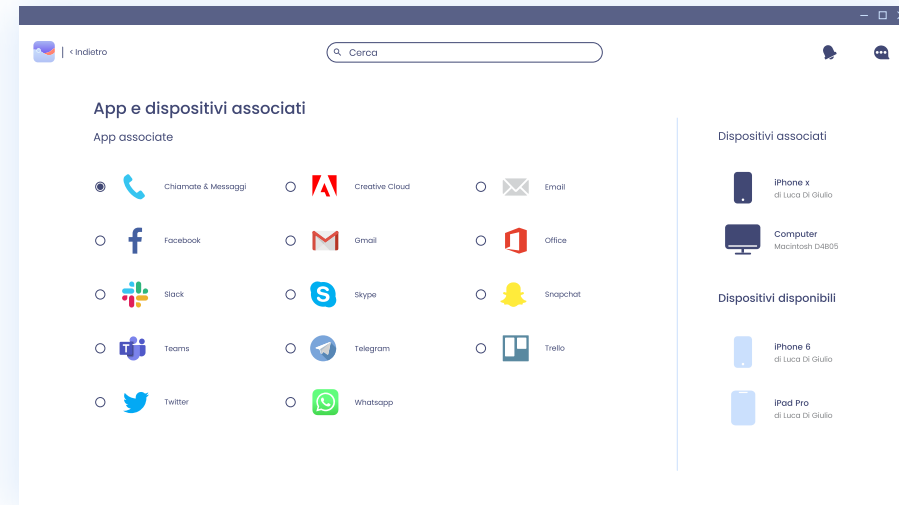

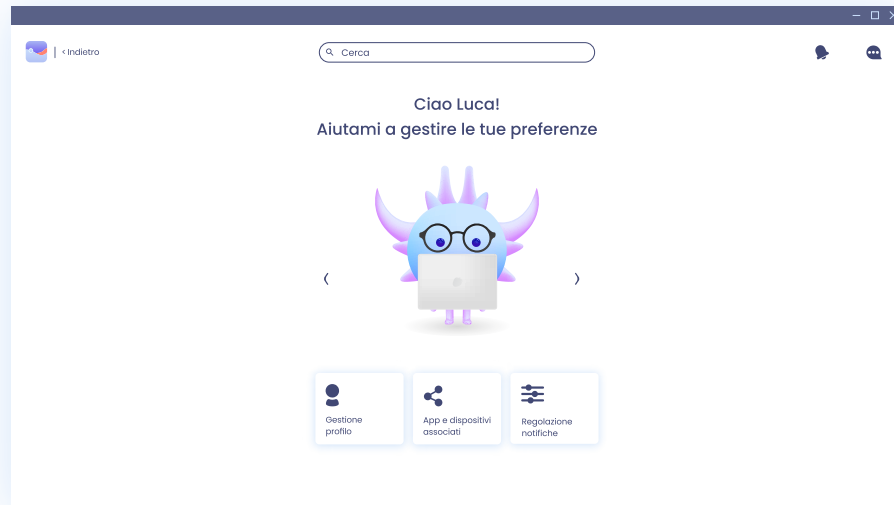

Recuperare le notifiche filtrate è semplice e intuitivo.

Notifiche

Apple Watch

Apple Watch

La versione Apple Watch rende ancora più smart la navigazione di unsteady, consentendo all'utente di monitorare il comportamento dell'app anche quando il telefono è spento o si trova fuori dalla propria portata.

Resoconto

Confronta i resoconti periodici delle tue attività in poche schermate

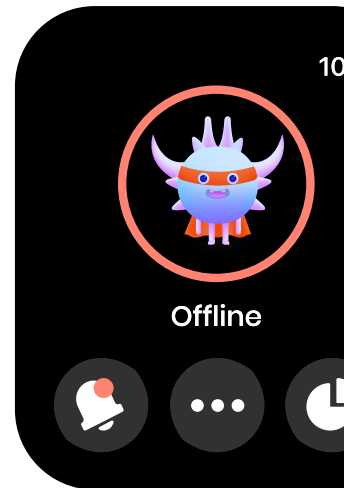

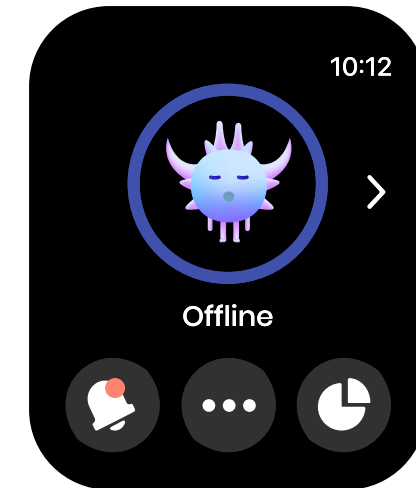

Utilizzo dei bottoni

L'invio dei bottoni e la visualizzazione delle richieste di contatto è semplificata

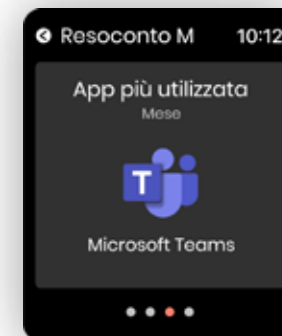

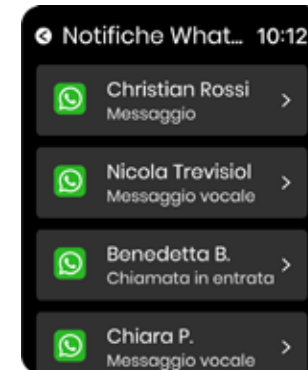

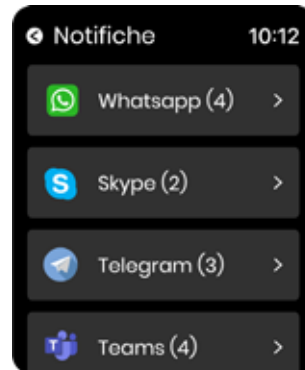

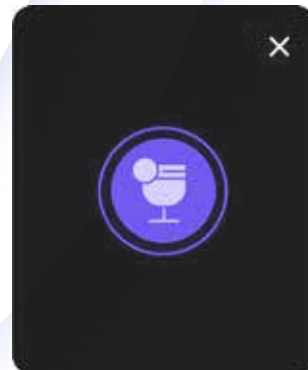

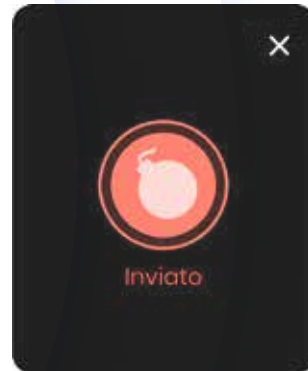

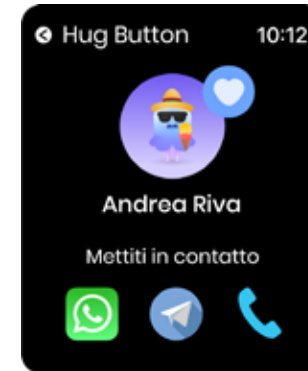

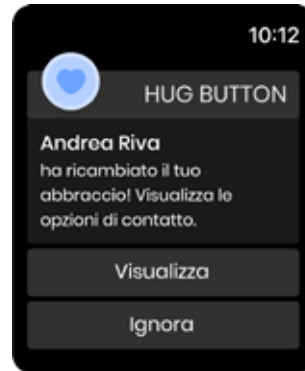

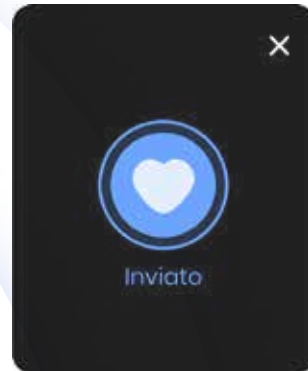

Interfaccia Apple Watch

L'interfaccia per Apple Watch condensa le funzioni più importanti in pochi tap
